

THE GREAT DEPRESSION

The world will head into the greatest depression we have ever seen between 2016 to 2020, worst than all other depressions added together, based on the cycles of master forecaster W.D.Gann. Thanks to Labor we will go to a deeper DEPRESSION than if the Liberals were in, because they had followed Gann's statement "PREPARE FOR THE WORST AND YOU DON'T HAVE TO FACE THE WORST". You have to get ready now; you can't do anything in 2016 it's too late. Just offload all your assets to Labor voters and you will be fine. You needed to have cash reserves, which is what the Liberals had. D.DUR (someone's name spelled backwards). All the Liberals have to do is bring in a flat tax, reduce government size, cut out handouts to losers and they will be back in.

You must understand that all BOOMS are done out of easy credit and BUSTS by tightening credit. No booms are done from savings. These are always done in the right TIME CYCLES so you get maximum effect so the MASSES suffer. (Then sell them drugs because they are stressed and depressed, it's all a big game). This will be the worst depression because it's the first one since coming off the gold standard.

The Governments and banks are running the biggest PONZI SCHEME going, robbing Peter to pay Paul and you think BERNIE MADOFF was bad?

The US Federal Reserve is not owned by the US government, it's owned by the banks. Members of the BILDERBERG group owns the banks (www.globalresearch.ca/index.php?context=va&aid=13808).

Also look at "The Obama Deception" and see who the members are!! video.google.com/videoplay?docid=7886780711843120756

Money used to be backed by Gold called the Gold Standard which we fully disbanded in 1971 when Nixon was elected. This created inflation which sent the cost of goods sky high. Money was lent out at 10 to 1 and in the last 10 years 50,100 etc to 1 or more. What does this mean? It works like this, the Federal Reserve prints \$100 for 6 cents, lends to the bank at say 4% which is then lent out to credit card at 19% or more. Now 6 cents into \$19 (19% on \$100, had to put this here Labor voters can't use a calculator until the education revolution kicks in, once they get educated they will then vote Liberals) is 316% return. Times that by 50 or more (the ratio lent out plus costs on top of that) and you are looking at anything from 16,000% to 30,000% return per year. On the other hand people should be responsible themselves and not borrow money; you should have no debt and a year's wages in the bank in case you lose your job. Proverbs "The borrower is always a servant to the lender".

As Groucho Marx (1895-1977) said "BANKS LEND YOU AN UMBRELLA WHEN THE SUN IS SHINING AND WANTS IT BACK WHEN IT'S RAINING".

As Gann said "Study human nature and see what fools these mortals will be"!! There's a lot out there.

Because we don't have a Federal Reserve we just can't keep printing money, we have to borrow, now 10% on the \$300 billion is \$30 billion per year. When we go to 18% it's \$54 billion per year. We had \$90 billion of debt and 18% interest rates. Now we have \$360 billion of debt, which is four times. 18% times four equals? Yes 72% interest rates, those Labor voters must be proud of themselves. I only buy products from liberal voters companies. Interest rates have been to 145% in the US in the 1890s, maybe ours will go 30, 40 or 50%, they went to 30% in NZ in the 80s because the country was so badly run, but time will tell in this downturn which is due to last more than 12 years. Now TAXES will go up on investment properties, shares, electricity, rates and a big jump in G.S.T. Labor will do this because of the \$300 billion spend up, this is because they gave incentives to people who can't create anything, no wonder business is going to India and China. The wool industry stored wool for 12 years and still went broke. All these handouts are doing is storing debt, it won't work. Storing costs money. All the States that are run by Labor are busted as well. Of course when taxes go up, more business will fail making the debt even worse, putting Labor voters out of work. The reckless spending by Labor will help Liberal businesses put money away ready for the collapse. Liberals voters must save their money. What is Labor's education revolution?

"If you spend more than you earn, you will go broke"!! \$1 in, \$5 out, what does that equal?? This could be a revolution!! But I'm not sure. I will have to wait to get the answer on broadband!!

The printing of money at the rate the US Federal Reserve is will cause HYPER-INFLATION as what happened in Germany 1923 (www.usagold.com/germannightmare.html). The people who protected their wealth in 1923 and got out before it all collapsed invested in rare coins (www.rarecoin.com.au), stamps, investment art because paper notes became worthless. This will cause the US Bond

What clients say:-

Our family began marketing its grain using David Burton's advice late in December 2007, we went to David frustrated and we were ready to give up trying to market and hedge to protect income and profit. We had been receiving advice from AWB over the past few years before David and had run up losses of over half a million dollars through poor advice and poor decisions based on the wrong advice. Over the past 2 years David has reinstated confidence in our marketing approach and has helped us make over three million dollars in profit, a direct result of smarter marketing. The financial gains we have achieved over the past 2 years with David's marketing strategy are unparalleled by any other new activity/practice or technology that we have seen over the past ten years. We have outperformed the pools by \$150 per/tonne in 2008.

He has helped our business and saved us time and money by not delivering to pools; this has cut down on paper work, made our cash book keeping more transparent and made us more money. There aren't many things you can do in the world of agriculture these days that save you time, paperwork and make you more money and I have travelled the world trying to find these types of strategies. Take the 2 day marketing course and see what your wheat is really worth; after all you have taken the time to grow it. See you there.

Grain grower Esperance

market to collapse and in turn the stock market. They will probably create a new currency to hide the fraud they have created.

Who believes INFLATION is at 2%? What has happened is that governments around the world have taken food and oil out of the index since 1992, the things the inflation is calculated on. Oil rose from \$10 a barrel in 1999 to \$150 in 2007, that's 30% compounding every year for 8 years. Also in the index is not showing a rise in government charges or taxes. Go to <http://www.shadowstats.com> for a true indication. The reason government did this was so the workers (Labor voters) wouldn't ask for a pay rise and the companies make more profits, sorry to the CEOs.

Because there is more debt than there is cash, and if everyone wanted to pay your debt off today it couldn't be done, don't believe me, try and pay all your debt off today. You are always going to get bankruptcies as well as a lot of late payments with this monetary system we have. There goes the first home buyer, about to become the first home sellers!! This will cause a fall of more than 80% in real estate. Banks should not lend out money without a 35% deposit and based on one income not two; this was the case 30 years ago. As the price of houses go up the deposits should increase to 50% or higher as we close to another top in the market. You won't see these prices in your life again. I wouldn't touch real estate with a barge pole, plus it only return 3.75% gross compounding over 30 years anyway.

I guess the Liberal voters are happy because they sold their homes to the Labor voters at the top and made a killing.

THE STOCK MARKET is another PONZI SCHEME where companies issue stock to the public to get interest free money as they can't borrow from the bank. Lately they have been issuing more shares at a discount because they have run out of money. Expect the All Ords to go below 280 by 2020. I haven't owned a share for 18 years. Two of the greatest traders in the world W.D.Gann and Jessie Livermore never invested in the share market. W.D.Gann preferred to trade commodities as they were the necessities of life. No one needs a stock to live. A lot of companies are poorly run, with C.E.Os well over paid, they travel first class, dine at the best restaurants, have credit cards etc all coming from shareholders money. The management should be on no more than \$50,000 and get bonuses only after the company has a debt equity of 20/80% and the shareholders gets double the yearly bank bill rate as a return. Remember a lot of people work for companies because they can't make it in their own business and the same with a lot of government people, that's why they stuff things up. A lot of people are going to lose all their super if in the share market. The money hasn't been lost in the stock market it just changed hands, went from Liberal voters to Labor votes. The smart money got out at the top. Remember the band was still playing as the Titanic went down!!

Because commodities will rise only because of the falling US dollar farmers will need to hedge their import costs. LEARNING TO TRADE COMMODITIES WILL BE ONE OF THE FEW HEDGES.

Go to SCHOOL OF GANN (www.schoolofgann.com) and "Your Trading Edge" (www.ytemagazine.com) for past articles.

ATTENDING THE TWO-DAY GRAIN WORKSHOP COULD SAVE YOU FROM GOING BROKE.

TWO DAY GRAIN MARKETING WORKSHOP 3rd & 4th August 2009

The two day workshop will be held in Perth and is limited to the first 50 people to register. The workshop is like nothing else, it will teach you the truth about the corrupt marketing system and why you need to do your own. Your most likely free advice at present, but will cost you dearly in the end. I'm not on wages, there's a big difference, and haven't been on wages since 1990.

You will learn the following:-

- How to develop a 10 year business plan.
- Why pools never perform, pools are for fools.
- How tracking the basis can improve your prices from \$20 to \$100 per/tonne.
- How to develop your own pool.
- Understand the use of commodity options, futures and currency.
- Why only 20% of farmers will succeed in the next 10 years.
- Why hyper-inflation is coming which will send costs sky high and how to hedge them.
- Why storing commodities will send you broke.
- Why land values will fall 80% between 2016 and 2020, don't buy now you are 12 years too early. The values in 2006 won't return for nearly 30 years.
- How the cycles of W.D. Gann predicted the financial collapse in the economy. (I love the meltdown, my purchasing power has increased).
- How my clients got out of the stock market at the top and invested in off farm investments which returned 16% in 2008. There's no money lost, it's just changed hands. From the weak to the strong.
- How the Labor Government will send interest rates sky high with their bad mis-management and the printing of money.
- Will show you how my top clients acted and received over \$420 per/tonne for wheat over the last five years, \$600 in 2007, \$530 in 2008. Don't believe me? Ask them they will be there.
- And of course there's lunch if you can eat after you hear the truth.

Cost \$2,500 (inc GST), now if you can't afford that, then you need to come as your marketing and business plan isn't working for you.

Where: Perth University, Crawley, WA
When: 3rd & 4th August 2009
Limit: First 50 people

Cost: \$2,500 including GST
RSVP by 16th July 2009
